

FP 1 ☀️ 🌿 🦋

Hesperaloe parviflora

Red yucca

Seasonal interest: red flowers from spring through summer

S 1 ☀️ 🌿

Acacia constricta

whitethorn acacia

Seasonal interest: yellow blooms in late spring and fall

S 1 ☀️ 🌿

Dalea formosa

Feather Dalea

Seasonal interest: late spring to fall deep violet flowers

S 1 ☀️ 🌿

Rosmarinus officinalis

Rosemary

Seasonal interest: small blue flowers everblooming in warm climates

PS 1 ☀️ 🌿

Spartium junceum

Spanish Broom

Seasonal interest: late spring and summer profuse fragrant yellow flowers and green stalks

FP 1 ☀️ 🌿

Lavandula angustifolia

Lavender

Seasonal interest: brilliant purple flowers

T 1

Parkinsonia florida

Palo Verde

Seasonal interest: bright yellow blossoms in late spring

T 1 ☀️ 🌿 🦋

Mesquite

Mesquite

Seasonal interest: summer blossoms and fruit

T S

Quercus

Oak tree

Seasonal interest: evergreen, flowers in spring

PH S 2

Salvia

Salvia

Seasonal interest: purple flowers in spring

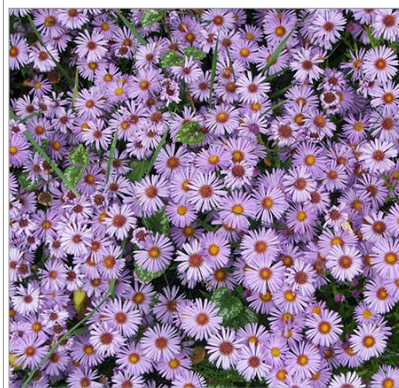

PH 2 ☀️ 🌿

Penstemon

Penstemon

Seasonal interest: early summer purple and blue flowers

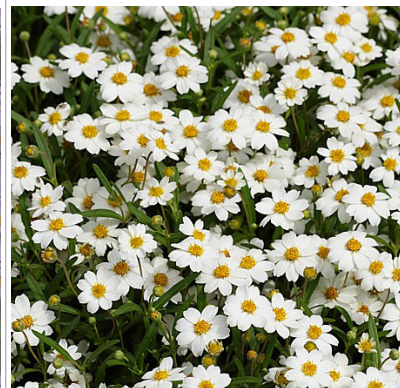

PFP 2 ☀️ 🌿 🦋

Aster alpinus

Aster

Seasonal interest: large summer blooms

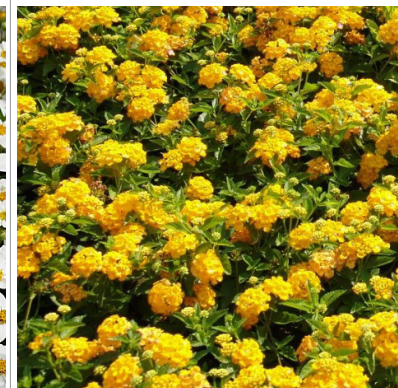

PS 2 ☀️ 🌿

Melampodium leucanthum

Blackfoot daisy

Seasonal interest: white flowers in late spring through early fall.

PFP 2 ☀️ 🌿 🦋

Lantana camara

Gold Lantana

Seasonal interest: year round yellow flowers

S 3 5 ☀️ 🌿

Euphorbia antisiphilitica

Candelilla

Seasonal interest: pinkish-red flowers in spring and summer

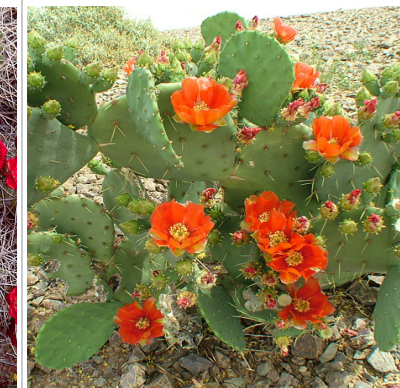

SU 3 4 6 ☀️ 🌿 🦋

Echinocereus

Claret cup cactus

Seasonal interest: long bright red flowers in summer

SU 3 4 6 ☀️ 🌿 🦋

Opuntia engelmannii

Engleman's prickly pear

Seasonal interest: yellow and red blossoms sporadically in April and May

SU 3 5 ☀️ 🌿 🦋

Cylindropuntia imbricata

Tree Cholla

Seasonal interest: purple or magenta flowers in late spring and early summer

## LANDSCAPE ZONES

### 1 PERENNIAL BUSHES

The flowering bushes selected for zone 1 are all tall perennial bushes. They act as a backdrop to the lower plants in zone 2 and help protect the mud plaster on the south face of the north wall. The bushes were chosen for their contrasting colors, fragrance and their ability to attract hummingbirds and butterflies.

### 2 PERENNIAL FLOWERS

The flowering plants selected for zone 2 are all low height plants that will bloom at different times throughout the spring and summer. They act as a line of color that draws ones eye to the distant landscape from the north entrance of the house. The flowers were chosen for their contrasting colors, fragrance and the ability to attract hummingbirds and butterflies.

### 3 MEADOW

The meadow landscape is an intensification of the surrounding terrain. This zone features a rich and diverse variety of plantings native to the chihuahuan desert. The terrain bleeds into the planted meadow surrounding the house blurring what the boundary between what is new and what what existing.

### 4 SOTOL

The repetitive rows of sotol plantings are a reference to the artistry of Donald Judd and his approach to the landscape at the Chamberlin Building.

### 5 INNER COURTYARD

The inner courtyard features plantings native to the Chihuahua desert that thrive in a protected environment.

### 6 ENTRY PATH

The muhly grasses and prickly pears line the entry sequence, transitioning from the dust of the open road to the protected and softened experience of the house.
